Education

Aswan university

Aug. 2018 – July 2023

Bachelor of Computer Engineering

Relevant Coursework

- Data Structures
- Software engineering
- Algorithms
- Database Management
- Computer Architecture

Experience

Freelancing

Marakeb Al Atyab

- Developed a website for Marakeb Al-Atyab Company, a company that operates in the trade of food products, detergents, diapers, and household goods.
- Utilized a pre-built template that was built using HTML, CSS, JavaScript, and Bootstrap.
- This website contains multipages like home, about us, gallery, projects and more
- Ensured the website was responsive and mobile-friendly.
- **Live demo :** <https://marakibatyab.com/>

Projects

Getflex | *React js, Material ui, Redux*

- Getflex is a movies website implemented using react js as a framework for developing , material ui as an UI library that have a lot of UI components and redux for state management.
- Using an api from Tmdb , this api has a lot of endpoints which i use a lot of them in my website so i get now playing movies , popular or top rated movies and another endpoint for searching and more.
- Website is multipages and responsive
- **Live demo :** <https://getflex-v3.vercel.app/>
- **Github link :** <https://github.com/mohammednabi/GETFLEX-V3.git>
