EDUCATION

Bachelor of computer engineering

Aswan university

2018-2023

Computer engineering fresh graduate from Aswan University with a strong academic background. Skilled in software development and hardware design

EXPERIENCE

MEMO-SOCIAL

- The project aimed to create a social media application similar to Instagram, allowing users to share photos, follow others, like and comment on posts, and engage in a vibrant online community.
- The application was built using Next.js and Firebase for various functionalities such as authentication, database management, and storage.
- This app provided user registration and authentication features. Users could create their accounts, log in securely, and maintain personalized profiles.

GETFLEX

- Movies website developed using React.js. Designed and built an intuitive user interface to provide an engaging movie browsing experience.
- Integrated with movie databases and APIs to fetch and display up-to-date information about a wide range of movies.
- Implemented search functionality to allow users to easily find movies based on title, genre, or other criteria.
- **Link : <https://getflex-v3.vercel.app/>**

MM Store

- Created and launched an online store website showcasing a diverse range of products and categories.
- Incorporated a reliable product catalog system, empowering users to explore and search for products based on categories.
- Established a user-friendly cart system, empowering users to effortlessly add products, modify quantities, and proceed to checkout.
